Tissue Boxes

Dairy & Frozen Food Boxes

Books & Construction Paper

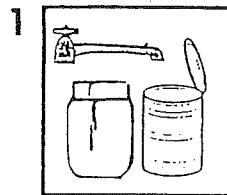

MIXED PAPER includes many types of waste paper products generated in the home. Paper products **MUST** be dry and free of food residues and restroom waste.

PAPER can be mixed together and placed in bags or small boxes which can also be recycled. Flatten boxes to save space. Place separated paper on top of, or next to, your full recycling bin.

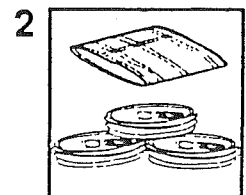

CORRUGATED CARDBOARD **MUST** be flattened and boxed, bagged.

NEWSPAPERS **MUST** be boxed, bagged.

PREPARING GLASS AND CANS FOR RECYCLING

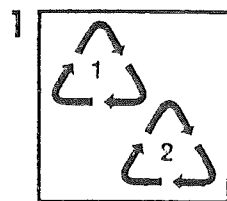

1 RINSE your cans and glass.

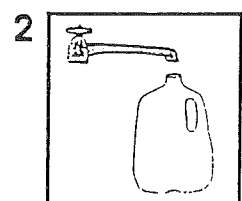

2 CRUSH cans if possible to save space.

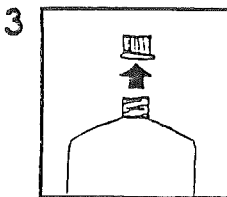

PREPARING PLASTIC FOR RECYCLING

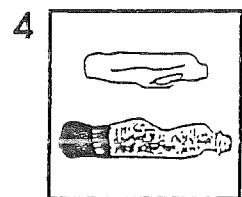

1 IDENTIFY: Only containers with these codes (on the bottom of the container) are acceptable; the base must be larger than opening.

2 RINSE your containers. You don't have to remove any labels.

3 REMOVE caps, rings and pumps and place them with regular garbage.

4 FLATTEN, if possible, so it takes up less space.

PREPARING PAPER FOR RECYCLING
